Research Papers

Statistical modeling of agricultural chemical occurrence in midwestern rivers
W.A. Battaglin and D.A. Goolsby 1

Hydrological processes at two subtropical forest catchments: the Serra do Mar, São Paulo, Brazil
M. Fujieda, T. Kudoh, V. de Cicco and J.L de Calvarcho 26

A parsimonious model for simulating flow in a karst aquifer
M.E. Barrett and R.J. Charbeneau 47

Criterion for location of downstream control for dynamic flood routing
A.K. Singh, P.D. Porey and K.G.R. Raju 66

Gas migration through water-saturated, fractured rock: results of a gas injection test
M. Gascoyne and D.M. Wuschke 76

Runoff generation on a semi-arid agricultural catchment: field and experimental studies
T.X. Zhu, Q.G. Cai and B.Q. Zeng 99

Evaluation of optimal channel network and river basin heterogeneity concepts using measured flow and channel properties
R.P. Ibbitt 119

Density-driven groundwater flow in closed desert basins: field investigations and numerical experiments
Y. Fan, C.J. Duffy and D.S. Oliver Jr 139

Particle transport in macropores of undisturbed soil columns
O.H. Jacobsen, P. Moldrup, C. Larsen, L. Konnerup and L.W. Petersen 185

Importance of rural roads as source areas for runoff in mountainous areas of northern Thailand
A.D. Ziegler and T.W. Giambelluca 204

A 2-D, diffusion-based, wetland flow model
K. Feng and F.J. Molz 230

Tracer-based studies of soil water movement in semi-arid forests of New Mexico
B.D. Newman, A.R. Campbell and B.P. Wilcox 251

Water salinization in arid regions—observations from the Negev desert, Israel
R. Nativ, E. Adar, O. Dahan and I. Nissim 271

Simulation of a free-surface and seepage face using boundary-fitted coordinate system method
K.-K. Lee and D.I. Leap 297

Variability of water fluxes through the black spruce (*Picea mariana*) canopy and feather moss (*Pleurozium schreberi*) carpet in the boreal forest of Northern Manitoba
A.G. Price, K. Dunham, T. Carleton and L. Band 310

A simple procedure to model water level fluctuations in partially inundated wetlands
J.F.M. Spieksma and J.M. Schouwenaars 324

Modelling the physical characteristics of simulated rainfall: a comparison with natural rainfall
S. Assouline, A.E. Idrissi and E. Persoons 336

Chemical dilation and the dual porosity of humified bog peat
D.P. Ours, D.I. Siegel and P.H. Glaser 348

Modelling the hydrological behaviour of a mountain catchment using TOPMODEL
L. Holko and A. Lepistö 361
